Profile

Associate Product Manager | Data-driven Product & UX | 1+ yrs building 0→1 & growth products

Professional Experience

Associate Product & Growth Manager, Omniful.ai 	01/2025 – Present Gurgaon, India
- Conducted market analysis for 2 product launches across 5 MENA markets, identifying regional demand patterns and 6–8 key feature gaps. - Partnered with business teams to define product positioning and GTM strategy - Used SEO, newsletter, and engagement metrics (CTR, open rate, page rank) to drive data-backed content and feature prioritisation. - Improved newsletter open rates from 40% → 65% and increased CTR by ~30% over 6 months. - Built and maintained a centralised Knowledge Base with 50+ articles, reducing repeated internal queries and improving customer self-serve adoption.	
Data Analytics Intern, Publiq.studio 	05/2024 – 08/2024 Remote, India
- Built a data analytics platform analysing 100K+ rows of e-commerce data to surface actionable insights for sellers. - Identified pricing and demand trends that helped drive ~20% sales uplift for client accounts. - Created dashboards and visualisations to support product and business decision-making. - Collaborated with cross-functional stakeholders to translate insights into product and feature recommendations.	
SDE Intern, Bench Work Technologies 	05/2023 – 12/2023 Remote, India
- Defined functional requirements and assisted in sprint planning and delivery timelines. - Reduced context-switching and meeting overhead by ~30% through workflow optimisation. - Supported CI/CD pipeline updates, improving release reliability and deployment speed.	
Product & Growth, EpicFly, EpicFly 	12/2022 – 12/2023 Remote, India
- Identified market gaps for agency digital presence solutions through direct client discovery and competitive analysis. - Led end-to-end product development for 5+ client websites and growth initiatives from ideation to launch. - Worked closely with designers and developers to ship features aligned with user feedback and business goals. - Improved client advertising performance by ~15% using data-driven experimentation and optimisation. - Managed a team of 6 across design, development, and marketing.	

Projects

Order Placement Journey 	05/2025
- Analysed user flows for a D2C checkout funnel with 10+ identified friction points. - Created wireframes and UX mockups proposing 6 high-impact improvements. - Reduced cognitive load and improved checkout speed through flow simplification.	
PhonePe - USP Deep Dive 	01/2025
- Proposed “Save & Split” feature to address retention drop-offs in frequent payment users. - Estimated revenue and retention impact using AARRR funnel assumptions and usage benchmarks. - Mapped feature impact across activation and retention stages.	
Retention Growth Framework: Driving 1.4× Repeat Usage in a Fintech Funnel	11/2025
- Built a retention-focused lifecycle framework to move users from first transaction to habitual usage. - Designed engagement nudges across Day 0, Day 7, and Day 30 touchpoints using lifecycle marketing principles. - Identified key drop-off points and proposed interventions aimed at achieving 1.4× improvement in repeat usage.	

Skills

- Analytics & Tools: Google Analytics, Mixpanel, SEO, CTR Analysis, Notion, Figma
- Technical: Python, Flask, Django, React, SQL, Pandas
- Marketing & Growth: Lifecycle Marketing, Acquisition Funnels, AARRR Metrics, Campaign Analysis, GTM Strategy
