Education

Bachelor of Technology in Information Technology, Jaypee Institute of Information Technology - 8.0 cgpa 	2021 – 2025 Noida, India
---	-----------------------------

Professional Experience

Associate Product Manager, Omniful.ai 	01/2025 – Present Gurgaon, India
- Drove early discovery, competitor analysis, and client requirement mapping to shape Omniful’s modular, compound SaaS product strategy. - Integrated 35+ shipping partners, 12 marketplaces, and 4 ERPs to expand ecosystem capabilities. - Designed TMS Workflow automation (order lifecycle, trip allocation, Returns Management, 3PL/courier integrations, returns) - Used CTR and behavioral insights to shape GTM, achieving 10M+ organic impressions (Search + AEO/GEO) - Improved newsletter open rates from 13% → 39% and increased CTR by ~30% over 6 months.	
Data Analytics Intern, Publiq.studio 	05/2024 – 08/2024 Remote, India
- Queried and analysed 500K+ rows of e-commerce data using SQL and Python to identify pricing inefficiencies, demand patterns, and conversion drop-offs. - Developed dashboards and visualisations to translate complex datasets into actionable recommendations. - Conducted root cause analysis on campaign and sales performance, enabling data-driven interventions that improved client revenue by ~15%.	
Product & Growth, EpicFly, EpicFly 	12/2022 – 12/2023 Remote, India
- Identified market gaps for agency digital presence solutions through direct client discovery and competitive analysis. - Led end-to-end product development for 5+ client websites and growth initiatives from ideation to launch. - Worked closely with designers and developers to ship features aligned with user feedback and business goals. - Improved client advertising performance by ~15% using data-driven experimentation and optimisation. - Managed a team of 6 across design, development, and marketing.	

Projects

PhonePe - USP Deep Dive 	01/2025
- Proposed “Save & Split” feature to address retention drop-offs in frequent payment users. - Estimated revenue and retention impact using AARRR funnel assumptions and usage benchmarks. - Mapped feature impact across activation and retention stages.	
ChatCharts  , Personalised gifting platform based on your weird and wonderful conversations!	05/2024
Developed a chat analysis tool that converts uploaded chats into visual analytics, highlighting trends like message frequency and keyword usage. - Achieved a high user engagement rate, driving meaningful interactions and personalized insights. Skills Acquired: Flask, Python Hands-On, Django, Backend, User Engagement Strategies	
Ads Performance Dashboard & Insights Automation	01/2026
Built performance dashboards tracking CTR, CPA, ROAS, and engagement, enabling 30% faster decision-making using Python and automated data pipelines Implemented anomaly detection models to flag performance drops, reducing issue detection time by 40% and improving campaign stability Standardized insight documentation into reusable frameworks, increasing analysis efficiency by 35% and reducing repeat effort Optimized measurement systems via event tagging and conversion tracking, improving data accuracy by 25% and enabling consistent KPI standardization across teams	
InsightsIQ, Retention Growth Framework	08/2025
Built a dashboard to simplify complex data, enabling real-time market and competitor tracking. - Analysed lifecycle behaviour to identify activation and retention drop-offs, proposing data-driven interventions to improve repeat usage by 1.4x. - Built structured experimentation and measurement plans using AARRR metrics to validate engagement hypotheses. Enhanced seller decision-making, contributing to e-commerce platform growth by 21%.	

Skills

Roadmapping, PRDs, Agile, stakeholder mgmt, Data Analytics, SQL, Python, APIs, webhooks, High Level System Design

Achievements

Semi Finalist in Adobe Gensolve AI Challenge, Adobe	08/2024
Winner Business Planning Competetion, Jaypee Institute of Information Technology	04/2023
